

Fort Huachuca

Funding to Protect Land

Secured \$100 million for the Readiness and Environmental Protection Integration (REPI) program, allowing the Department of Defense to partner with conservation trusts to acquire land. The land will be used to protect Fort Huachuca from commercial or residential encroachment that could undermine training or the use of the airspace.

Increase focus on Water Resiliency

Secured a mandate for the Army to brief Congress on lessons learned from the Net Zero Initiative Pilot Program to ensure the Army is a better steward of natural resources.

Funding for the Defense Information Systems Agency Laboratory Building

Secured \$33.7 million for military construction on the Defense Information Systems Agency Laboratory Building at Fort Huachuca. The DISA Lab Building will consolidate Joint Interoperability Test Command operations, which are currently located in temporary trailers, into a modern facility at Fort Huachuca. JITC testbed facility will provide global testing capabilities, which extends to the entire spectrum of DoD, Federal government, private industry, and allies in support of commands and control, intelligence and defense reform initiative.
